

Fine Turf Foliar Programme

GROWTH STAGE	Spring	Summer	Autumn	Winter
Product				
Aqualatus/Integrate	120mls/1000m ² initial application and monthly at 60mls/1000m ²			
Fortify Cu*	200-400ml/1000m ² at 14 day intervals			
Sion*	100ml/1000m ² at 7-10 day intervals			
Sentinel*	100ml/1000m ² at 14 day intervals			
VerdeNT	1.0-2.0L/1000m ² at 14-28 day intervals			
Cypher	300ml/1000m ² at monthly day intervals			

Aqualatus/Integrate	Fortify Cu	Sion	Sentinel	VerdeNT	Cypher
<p>A water management liquid which creates and equilibrium of water and air in the rootzone and reduces overall all irrigation and nutrient requirement.</p> <p>Aqualatus will also manage rootzone aggregation to maintain open structure and will increase efficacy of root applied nutrients and other chemistries</p>	<p>A foliar applied technology which uses nutrient charges and bio-stimulation to reduce susceptibility to disease infection.</p> <p>Regular use of Fortify Cu has proven to reduce susceptibility to infection from fusarium, dollar spot, take all, red thread and fairy ring.</p>	<p>The worlds market leading liquid silicon fertiliser. At 21% Si, Sion is 100% pure available silicon which will optimise blade strength against stress of any kind, whether mechanical abiotic or biotic.</p>	<p>A unique blend of silicon/salicylic acid which aids regrowth and would repair from regular mowing.</p> <p>With regular use, Sentinel acts as a feeding deterrent from insect pests.</p>	<p>A advanced blend of slow release nitrogen, calcium and a unique bio pack to aid assimilation of nutrients and manage stress</p>	<p>A blend of organic acids which optimises nutrient availability by keeping salt bonds active and naturally chelating cation nutrients. Cypher will also stabilise pH with regular use, and supports a healthy rootzone.</p>

*Apply with other spray applications to increase nutrient mobility reduce effects of biotic and abiotic stresses.
