

Brix-Builder

0.7%: 0.1%: 0.5% w/v

Engage Brix Builder is a combination of naturally occurring biostimulant materials including seaweed extract and fermented plant materials which are designed specifically for boosting poorly performing plants.

The bio stimulant package enhances the vegetative development of the plant and its subsequent growth. It is ideal for increasing fruit and flower number and will increase brix levels.

Guaranteed Analysis

	w/v		w/v
Nitrate Nitrogen	0.7%	Polypeptides	1.35%
Phosphorus P ₂ O ₅	0.1%	Humates	0.6%
Potassium K ₂ O	0.5%	Fulvic acid	0.2%
Trace Elements	1.1%	Oligosaccharides	1.0%
Alginates	2.0%	Fluocoidan	1.4%
Mannitol	1.5%	Beta Glucan	1.3%
Amino Acids	1.8%	Sulphated sugars	0.4%
Plant sugars	2.2%	Vitamins A,B1,C & E	50ppm
Cytokinins	110ppm		

Crops

All fruiting and vegetable crops, flowering and ornamental species.

Directions for Use

- For best results apply Brix-Builder in the coolest parts of the day – early morning and in the evening. It is not advised to spray Brix-Builder when temperatures exceed 30°C or in full sun.
- pH of water is best between 5 and 7. Use Engage Reactor if pH is too high.
- Apply in sufficient water to ensure thorough and uniform coverage. 400-1000 litres of water is suggested.

Crop Timings and Application Rates

Crop	No of applications and timing
 Apple & Pear	Apply 1.0 litre of Brix-Builder per hectare, at 2-4 timings: starting at petal fall and repeat at 7-10 day intervals. To lift sugars before harvest apply Brix-Builder at 1.0 litre every 7 days from 4 weeks before expected harvest date.
 Melons & Cucumbers	Apply 1.0 litre of Brix-Builder per hectare, shortly after transplanting then repeat every 10 - 14 days up until harvest.
 Strawberries  Tomatoes  Peppers	Apply 0.5-1.0 litres per ha when plants begin to blossom. Repeat at 7-10 day intervals during growing season.
 Beans & Peas fresh/dry	Apply 2.0 litres per ha at sight of first bloom.

For more detailed application rates per crop please visit engagecropsolutions.com or speak to an Engage advisor.

Compatibility

Caution: Brix Builder is compatible with most chemicals used in crop protection but do not use it with dinitro compounds, dormant oil, Bordeaux, spray lime, or highly alkaline spray materials.

Cautions

Fire Hazard: Toxic fumes of sulphur dioxide on decomposition.

Ingestion: Harmful if swallowed.

Irritant: May cause irritation in contact with eyes and skin.
